

Statement of Purpose

I am writing to express my keen interest in the Internship Program in **Cyber Security** offered by the Office of the Superintendent of Police, Ahmedabad Rural. With a Bachelor's degree in Computer Applications and specialized training as a **Cybersecurity Analyst Associate at TATA Strive – TCS iON**, I am eager to contribute my skills and learn from this unique opportunity in law enforcement technology.

During my academic journey and professional training, I have developed strong expertise in **SOC operations, SIEM, log analysis, and incident response**. I am proficient in using cybersecurity tools like **Wireshark, Nmap, Metasploit, SQLMap, and Burp Suite** for threat detection, vulnerability assessment, and forensic analysis. My exposure to **EDR, SOAR, and MITRE ATT&CK framework** has strengthened my ability to analyze, monitor, and defend against security threats.

In addition, I have hands-on programming experience in **Python, Django, SQL**, along with web technologies like **HTML, CSS**, which enables me to contribute effectively to software development tasks. My project on developing a full-stack **E-commerce website using Django** demonstrates my capability to integrate software solutions with robust security practices.

I am deeply motivated by the prospect of contributing to meaningful projects that support law enforcement, particularly in the areas of **digital forensics, cybercrime investigation, and evidence handling**. This internship aligns perfectly with my career aspiration of becoming a skilled **Cybersecurity Analyst** capable of bridging the gap between technology and law enforcement.

I look forward to the opportunity to learn under experienced officers, gain practical exposure to digital forensics, and contribute my technical expertise to ongoing initiatives. I am confident that my background, combined with my enthusiasm to learn, makes me a strong candidate for this internship.

Thank you for considering my application.

Sincerely,

Dheeraj Prajapati

Ahmedabad, Gujarat
